PROJECTS

Venn - Event & Place Management System

Backend-driven event & place management platform powering a mobile app via APIs.

- **Technologies Used:** Laravel, MySQL, Blade, JWT Authentication, ClickSend
- **Key Responsibilities:**
 - Built Laravel-based admin panel and RESTful APIs powering a mobile application.
 - Integrated ClickSend SMS API for OTP verification during signup.
 - Developed chunked video upload to handle large files efficiently.
 - Processed and optimized videos using FFmpeg for blog content.
 - Integrated Spatie Media Library with AWS S3 for secure media storage.
 - Implemented FCM push notifications for real-time updates.
 - Deployed the Laravel application on AWS EC2 using Nginx and Ubuntu.
 - Configured GitHub Actions CI/CD pipeline to automate build and deployment.

AtoZ Limo & Chauffeur Dispatch System

Real-time chauffeur and limousine dispatch system with web and mobile support.

- **Technologies Used:** Laravel, Vue.js, Firebase, Stripe, MySQL.
- **Key Responsibilities:**
 - Implemented real-time ride scheduling using Firebase for live synchronization.
 - Developed a secure Stripe payment integration, ensuring smooth and safe transactions.
 - Implemented a comprehensive admin system with features to manage bookings, assign drivers, and track ride statuses.
 - Enabled multi-language support and localization to cater to a global audience.
- **Live:** <https://atozdispatch.com/> , <https://yourcompany.atozdispatch.com/>

Amheer - Chauffeur Service Platform

White-label chauffeur service platform with scalable user and role management.

- **Technologies Used:** Laravel, Vue.js, MySQL, Firebase.
- **Key Contributions:**
 - Implemented partner and sub-admin management features.
 - Designed role-based access control for secure operations.

- **Live:** <https://amheer.com/>

London Driving Academy Management System

Web-based driving school management and booking system.

- **Technologies Used:** Laravel, Blade, MySQL.
- **Key Contributions:**
 - Implemented a blogging module to improve user engagement and SEO performance.
 - Developed an admin-controlled block days feature, enabling administrators to mark specific days as unavailable for bookings.
 - Optimized existing features to enhance usability and operational efficiency.
- **Live:** <https://www.londondrivingacademy.co.uk/>

WORK EXPERIENCE

Backend Developer

UNO Technology Pvt. Ltd. | Jun 2025 – Present

- Leading backend development for an event & place management platform built in Laravel.
- Collaborated closely with mobile development team for API integration and feature delivery.
- **Additional Project Contributions:**
 - **GoodSam:** Worked on bug fixes and implemented a secure video upload module.
 - Supported multiple ongoing company projects by debugging issues and introducing new features as required.

Backend Developer

Coredreams Innovations Pvt. Ltd. | Dec 2024 – Jun 2025

- Designed and developed a real-time ride scheduling system with web and mobile integration.
- Integrated Firebase for seamless data exchange, reducing response times for frontend and mobile applications.
- Enhanced system security with Stripe payment integration and robust roles & permissions management.
- Led the implementation of a multi-language support system, making the platform adaptable for a global audience.
- Built a content management system (CMS) enabling clients to manage images, ride details, and other content.
- Optimized legacy projects, improving performance and maintainability.

Full-Stack Developer

Full Stack Developer Intern | Yej Tech Pvt. Ltd. Kathmandu Nepal | Dec 2023 - Mar 2024

- Developed and integrated RESTful APIs using Laravel, enabling efficient data exchange between the frontend and backend systems.
- Implemented role-based access control and authentication using Laravel's built-in features.

EDUCATION

- Bachelor of computer applications (BCA) | Goldengate int'l college.
- +2 from Everest Florida College.
- SEE from Khadga Memorial English Boarding school, Tikapur - kailali.
